United States – Willing to Relocate | +572 -239-6279 | avanthigakumar@gmail.com

## SUMMARY

Business Analytics graduate student with expertise in predictive modelling and data analysis. I am a SAS Certified Predictive modeler and proficient in SQL, Python, Power BI, Tableau and Excel.

## EDUCATION

**Master of Science in Business Analytics**

*University of Central Oklahoma*

Expected December 2025

*Edmond, OK*

**Postgraduate Diploma in Management Analytics**

*Mount Carmel College*

August 2023 – May 2024

*Karnataka, India*

## CERTIFICATIONS AND BADGES

**SAS Certified Predictive Modeler Using SAS Enterprise Miner 14:** Building, validating, and interpreting predictive models using SAS miner.

**SAS Certified Specialist Machine Learning using SAS Viya:** data mining techniques, end-to-end modelling, feature engineering, and model interpretation using SAS Viya.

**Alteryx Designer Core Certification:** Data Blending, ETL Workflow Automation, and Data Preparation.

**SQL for Analytics:** Data cleaning, aggregation, and visualization.

**Modern Database Design Essentials:** Relational & NoSQL databases, data modelling, and query design.

**Intro to MongoDB:** Document-oriented databases, CRUD operations, aggregation, data modelling.

**Power BI and Excel:** Data visualization, dashboard creation, and Excel-based analytics.

**Digital Marketing:** SEO, content strategy, and campaign analytics.

**Entrepreneurship and Marketing:** Marketing principles, business strategy, and start-up fundamentals.

## TECHNICAL SKILLS

**BI & Visualization:** Tableau, Power BI, Advanced Excel (PivotTables, VLOOKUP)

**Programming & Databases:** SQL, Python, R, SAS (Studio, Enterprise Miner, Viya), HTML, MongoDB

**Software:** SPSS, Microsoft Office Suite

## EXPERIENCE

**Data Analyst**

*Vanessa Napkins*

October 2023 – May 2024

*India*

- Leveraged SQL to extract and analyse data, performing trend analysis to identify key buyer segments.
- Informed targeted marketing strategies, contributing to an increase campaign effectiveness.
- Tableau dashboards to visualize competitor pricing, market share, and campaign performance.

**Reporting Intern**

*Conscript*

August 2021 – September 2021

*India*

- Generated comprehensive reports and provided data-driven insights to support strategic HR decision-making.
- Data integrity and Accuracy ensured by compiling, reviewing, and refining reports for organizational use.

## UNIVERSITY PROJECTS

**Predicting False Alarms - London Fire Brigade Data**

- Advanced predictive modeling using SAS Viya on 300K records, regression and ensemble techniques, feature engineering, and data transformation to predict false alarms using models with 85% accuracy.

**Power Outage Prediction Using Machine Learning Algorithms**

- Forecasted county-level power outages on 168K+ records using SAS Enterprise Miner; engineered 40+ features, applied data cleaning and balancing, achieving 72% model accuracy.

**Study on Customer Satisfaction and Loyalty**

- Analyzed 10K+ customer interactions using SPSS and regression to identify satisfaction drivers; presented actionable insights in Power BI dashboards to enhance retention and brand loyalty.

## SCHOLARSHIP

Graduate MSBA Scholarship

August 2024 – December 2025
